

BORESIGHTING RODS

Calibrated rods for boresighters

High precision calibrated rods

APPLICATIONS & BENEFITS

High precision calibrated rods for military maintenance, adapted to Elynxo LDBx4 and LDB-V sights to ensure perfect alignment of weapon systems.

KEY FEATURES

- User centric

High ergonomics: All our rods feature a 12mm interface, compatible with either our classic LDB x4 or LDB-V boresighters, as well as many boresighters from the market.

Flexibility of use: Rods designed to take into account flash hidens, muzzle breaks and other devices for most common barrels.

- Qualitative

High performance: Built from selected steels and redesigned for a higher resistance, our rods ensure high precision boresighting.

TECHNICAL CHARACTERISTICS

Available Calibers References

5.56 mm	D06-3138
7.62 mm	D06-0016
12.7 mm	D06-3130
20 mm	A20-3001
25 mm	A20-3005
30 mm	A20-3003
40 mm	A20-0045
Other calibers	On request
Artillery guns	Up to 155mm
Mortar boresighting	81 and 120mm

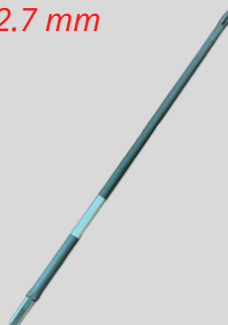

Example of use of a calibrated rod with a LDB-V
